

Important Alert to Business Owners Who Want To Allow Their Employees To Work From Home Or On The Road

If you are the owner of a company with 20 or more employees and want to enable your employees to work from home or while on the road, it is extremely important that you get and read this new special report:

“Critical Facts and Insider Secrets Every Business Owner Must Know Before Installing A 'Virtual Network' To Allow Employees To Work From Home, On The Road, Or From A Remote Office”

This report will feature cost control, project management, and productivity protection information, as well as case histories and details on how to avoid the most common costly mistakes companies make when implementing remote access.

For a limited time, copies of this exclusive guide will be made available on our web site. To instantly download and claim a free copy, go to:

The Ultimate Small Business Guide To Setting Up A 'Work From Home' Or Remote Network Access System For Your Staff

Critical Facts and Insider Secrets Every Business Owner *Must* Know Before Installing A 'Virtual Network' To Allow Employees to Work From Home, On The Road, Or From A Remote Office

If you are the owner of a small or medium sized business that is thinking about implementing a “work from home” program for your employees – or if you want to install a virtual network to enable you and certain key employees and managers to work on the road or from a remote office – DON'T - until you read this eye-opening guide.

This report will explain in plain, non-technical terms best practices for setting up remote access for you and your staff, as well important questions you should ask any computer consultant to avoid common, costly mistakes when setting up the technology for a work from home program.

You'll Discover:

- What “telecommuting” is and why so many small and medium sized businesses are rapidly implementing work from home programs.
- The single most important thing you **MUST** have in place before starting any work from home or remote office initiative.
- How one company saved \$11 million after implementing a work from home program – and how you implement the same money-saving strategies for your small business. How one company slashed its turnover rate from 33% to nearly 0% – and increased productivity by 18% - all by implementing a “work from home” program.
- 8 **CRITICAL** *characteristics you should absolutely demand* from any IT professional you're considering to setup your remote office technology; **DO NOT** trust your infrastructure to anyone who does not meet these criteria.

April 14th, 2020

From the Desk of Rory Reed

President

Valley Techlogic, Inc.

Dear Colleague,

My business, like most in the country, is now navigating the effects of COVID-19 and implementing strategies to allow my workforce to perform their duties from home. Having been in the IT business for a long time I'm no stranger to telecommuting and just how freeing it can be to be able to work anytime, anywhere.

My name is Rory Reed and for over 15 years, I have provided business and technology managed services to hundreds of small and medium-sized businesses in the Central Valley area. You may have heard of me before because my business has become a staple for many in the area and it's my hope to offer my services to you as well.

While it may seem like I'm making radical statements in this document, I want you to know that I'm not a radical person. As a matter of fact, one glance at the enclosed fact sheet about my background and expertise will show that I'm a very grounded and conservative-minded technology consultant with a long track record of helping my clients enjoy more stress-free productivity, lowered costs, and competitive advantages.

That's why I published this business advisory guide.

Telecommuting was already a fast-growing trend among small and medium-sized businesses; it has drastically increased productivity, cut costs, and driven more profit to their bottom lines. It's not a new management style or marketing trend, it's an effective strategy for allowing your business to continue even when the world stops.

Now more than ever is the time to get your workforce going again and through telecommuting you may find that yourself in an even stronger position than you were before. I think my company, Valley Techlogic, can help you deploy a work from home plan that's both comprehensive and thorough, no matter how complex your IT setup is. Best of all, we offer virtual appointments and contactless deployment. This guide is just the start, I invite you to reach out to me personally after you read it.

All the best,

Rory Reed – President of Valley Techlogic, Inc.

What Is Telecommuting And How Is It Going To Help My Business?

Telecommuting is a fancy word for allowing employees to work from home, in remote offices, or while on the road. While this is not a new concept, recent advancements in remote access technology and security have made it very affordable and easy for even micro-business owners.

Why would a business want to do this? Some businesses are being forced to because they've run out of office space or to accommodate "road warriors." But many are doing it for these reasons...

- Business owners (and key managers) working 60+ hours a week are using it as a way to continue working after hours and on weekends from the convenience of their home office.
- Allowing employees to work from home means businesses can cut back on office space, lowering rent and utility bills – and according to a recent survey of small businesses, nearly 40% of small and medium-sized businesses have (or plan to) cut down office space and allow employee to work remotely from home to save money. Not only is this lowering overhead, but it's making for happier employees who no longer have to fill their gas tanks.
- Telecommuting increases employee productivity, lowers stress levels, and improves knowledge retention. Contrary to what you may believe, employees who work from home tend to work *more*, not less. Because the computer is right there in their home, they will often put in extra hours during the evening and on weekends when they normally wouldn't be able to access the network. Plus, employees working on detailed programs, graphics, and projects tend to get more done when they don't have to deal with office distractions.
- Some companies are allowing their employees to work from home two or three days a week instead of giving them a raise – a bonus many will gladly take over more money. This also works well if you have limited office space because employees can rotate desk usage.
- It allows you to keep great employees that need or want to relocate, need to stay home to take care of a sick family member, or who are sick, injured, pregnant, or otherwise unable to physically come into the office.

Common Myths, Mistakes, and Misconceptions About Allowing Your Employees to Work From Home

One of the biggest fears many business owners have about allowing people to work from home is the loss of control they have over that person. They believe that without someone standing over them, employees will goof off during work hours and become LESS productive.

But the hard results prove very different...

Telecommuting has grown at a steady 3% per year for more than 15 years. Currently, more than **23 million people are working from home** at least one day a week. The increase in teleworking programs is no accident – it really IS working.

Admittedly, original telecommuting experiments were “do-gooder” projects focused on being earth friendly and generating business savings by reducing use of high-priced big city office space. However, when businesses started seeing how it drastically improved turnover and productivity, this “fad” became a hot trend.

Take the Los Angeles Bank for example; they decided to test telecommuting to see if it would help their 33% turnover rate. Here were the results...

The experiment worked and within a year the turnover rate was cut to nearly zero and to everyone’s surprise productivity went up 18% saving the regional bank more than \$3 million dollars per year.

Since then there have been numerous, well documented, program studies reflecting promising results. For instance, AT&T allowed employees to telecommute on a regular basis from home in a New Jersey office of 600 people.

Over a 5-year period a region of AT&T saved more than \$11 million annually. Half the savings came from real estate savings while the other came from a measured increase in incremental work hours from employees who were able to have a higher level of concentration with fewer interruptions.

You’re probably thinking, **“But I don’t have 600 employees...how does this apply to me?”** No matter how small your business or your real estate situation, you can save money. It’ll just be a bit smaller than AT&T. For instance:

On average, small businesses report saving \$85,000 to \$93,000 per year in lower turnover, reduced operating costs (gas, utilities, office space) and increased productivity after implementing teleworking programs. (Source: International Teleworking Advocacy Group)

Of course, telecommuting might not be right for every employee on staff, but it is a great option (and reward) for key managers or employees who are self-motivated and measured by results rather than hours worked.

The Single Most Important Thing You Must Have In Place Before Starting A Work From Home Program Or Setting Up Remote Access For Road Warriors

Before you go “whole hog” with a telecommuting or remote access, we recommend conducting a small test where you (and possibly a few key managers) are set up to work from home.

Once you are comfortable with the concept, you may start allowing a few key employees to work from home one day a week or a couple of days a month. Or, you can simply allow employees to use it while traveling or if they are forced to stay home to take care of a child, on a snow day, etc.

Of course, this is based on when things are back to normal. Right now, everyone that can work from home should be and we want to help you roll things out in a way that you feel comfortable with. We believe it's best to go at your own pace with any new setup or technology so both you and your employees have time to take it in and become acquainted with it.

But the single most important thing for you to do first is find a very experience IT consultant who will recommend and implement the right technology to support YOUR specific situation and needs. This is unbelievably important to avoiding expensive mistakes and unnecessary frustration.

8 CRITICAL Characteristics You Should Absolutely DEMAND From Any IT Professional You're Considering To Set-up Your Remote Office Technology; DO NOT Trust Your Infrastructure To Anyone Who Does Not Meet These Criteria!

There is no "one size fits all" solution; the best solution is greatly dependent on your specific business needs, the applications you use, how many people will be accessing your systems remotely, the available equipment and dozens of other factors. That's why you want to look for a consultant who meets the following criteria:

1. Look for a consultant who has experience setting up remote access and **STRONG (and recent) client references.**

Do you really want to be the person who "pays" for your consultant's training? I've found that the price to correct problems created by novices is much greater than the cost to do it right the first time with an experienced technician. Ask for *recent* references and call them! Past performance is generally a good gauge of future performance.

2. Make sure they do a **THOROUGH** evaluation up front

If your consultant doesn't insist on doing a thorough evaluation BEFORE handing you a proposal, do NOT hire them! If they don't do their homework, they could easily sell you the wrong solution, causing you to have to spend MORE money, MORE time, and have MORE frustration getting to what you really need. Most consultants will do a quick, cursory review and provide a free recommendation (proposal) because they want to close the deal fast. Here is a short list of the things they should investigate or ask you:

- What are your overall goals and specific objectives for allowing your employees to work from home or on the road?
- How many employees will be working remotely? Will they be accessing the network at the same time or at different times?
- What applications (including specialty or proprietary apps) and data will your employees need to access?
- What type of devices will your staff use to access the network? (Home computers, PDAs, Blackberries, laptops, etc.)
- What type of Internet connection will be available on the sending AND receiving end?
- What levels of security do you want in place?

- What level of monitoring do you want in place? For example, are there certain web sites and content you want “off limits?”
- Will the remote worker need to print documents?
- What are your 1 year and 3 year plans for growth?

3. Make sure they are able to **TRAIN** you and your staff.

So many computer consultants are great at installing the “stuff” but fall short on training you and your staff how to use the great “whiz-bang” technology they’ve just sold you. Make sure you hire someone who is able and willing to do the “hand holding” required when installing any new process or technology...we’re only human after all.

4. Make sure they can provide help desk support **AFTER** hours.

One of the main appeals to teleworking is the ability to work at night or on weekends; that means you need someone to be “on-call” during those off-peak hours if you or your employees have technical

problems logging in or accessing the network. Bottom line, if you’re your consultant doesn’t offer after-hours support, don’t hire them to do the job. There is no benefit to having remote access if you have to wait until Monday or 9am the next day for support.

5. Make sure they **INSIST** on maintaining the network

Virtual office networks require more 'care and feeding' to make sure they work properly and stay secure. You cannot “set it and forget it” or you’re asking for problems. Only hire someone who is prepared to perform regular check-ups and updates of your network, usually under a maintenance or managed services plan.

6. Look for someone who can also solve the phone piece of the puzzle, not just the network access piece.

If you want your work-from-home employee to be able to make and receive calls and APPEAR as though they are in the office to the caller, then look for someone who can set up your phone system to work with your remote employee’s home phone or cell phone. Usually this can be accomplished with VoIP technology (Voice Over Internet Protocol). Confirm that whoever you hire can either provide these services or has a partnership with a reputable vendor who has this expertise.

7. Make sure your consultant is willing and able to be a vendor liaison for your specific business applications or other specialty applications.

It's amazing how many critical applications work fine within the office network, but then slow down or shutdown when accessed through a remote location. It's important to ensure your consultant is able and willing to confirm your applications will operate efficiently remotely, which means they may need to get on the phone with the help desk of one or more of your software vendors. Some consultants do NOT offer this service or will charge you extra for it.

8. Look for a consultant has expertise in setting up employee monitoring and content filtering.

It's more difficult (but not impossible) to protect company secrets and proprietary information when it's stored on a location outside of your office. Therefore, make sure the company you hire has expertise in setting up and managing content filtering and security for remote machines.

Not Sure If You Are Ready To Set Up Remote Access? Our Free Remote Access Consultation Will Help You Decide

As a prospective client, we'd like to offer you a free Remote Access Consultation. At no charge, we will conduct a virtual consultation to review your current situation, business practices and needs and provide recommendations on how you can quickly and easily set up remote access for you and your staff.

We will also discuss your options, clarify any grey areas, and answer any questions you have. We will also map out the costs and steps involved so you know exactly what to expect.

You are under no obligations to do or buy anything; this is simply our way of introducing our services to you and demonstrating how we can make your remote access project a complete success.

Plus we're giving you a FREE "Home Office Action Pack" just for reading this guide! This package include:

- Home Office/Remote Office Checklist to help you verify the home or remote office is a safe and productive environment for the employee to work.
- Employee Agreement Template to outline the rules for your employees when working from home.
- Employee Equipment Issue Agreement to outline the rules of use and maintenance for any computer equipment, cell phones, PDAs, laptops, printers, etc. that are issued to the employee working remote.

We Can Show You How To Enjoy The Benefits Of Our Service, Just Like These Current Clients...

The difference is family...we care.

“We are a 140-bed skilled nursing facility, We have around 200 employees, Vendors, Doctors, Nurse Practitioners, Therapist, and residents that rely on the World Wide Web. I am sure technology will always be changing but VTL will be right there helping me. The best part of our Unlimited Package / HIPAA plan is... if there is an issue, we create a ticket and one of the guys will remote in. If I need something done on the server and it has to be done on site, it’s scheduled. If one of our nurses get locked out of the workstations at 03:00, they have VTL number and ...

Right now VTL is monitoring our systems... I get a monthly email with charts that tells me how our system is running... Phone calls come every month... Emails “Tickets” for assisting our employees... but every now and then some of the guys just text to see how things are going. The latest project we are doing is HIPAA monitoring. As CMS enforces California HIPAA rules for the Skilled Nursing Facilities, I hope to have a jump start. But I also know if there is something else, VTL can assist. I am also working with VTL to upgrade our security cameras. There are more projects that we have done together and more that are coming down the pipeline. For me Price is important but a great relationship counts for something. Yes, I try and look for a good deal... Yes, VTL will give me a fair answer.”

Alderson Olvera

Alderson Convalescent

“I previously was with a service that had a low-cost solution. They could not provide the service promised or fix our issues. They left everything half completed because they had to move on to the next issue with another client.

I rely on the monitoring to let me know if we have any issues. In the past when our power has gone out I have received calls saying that one of our backup systems did not start up. We have nearly 40 PC’s and two shifts, the monitoring is vital. Any employee has the potential of opening up or receiving malware or a virus. There is no one to train all the users all the time.”

NOTWITHSTANDING ANY PROVISION TO THE CONTRARY CONTAINED IN YOUR CONTRACT OR THESE TERMS AND CONDITIONS.

Home Office & Remote Office Checklist

If you are going to let your employees work from a home office, use this checklist to determine the adequacy of the work space. Remember, the success of your work from home project greatly resides on the ability of your employee to work productively and safely in this environment. If the work space is not adequate or not conducive to productivity, the telecommuting agreement will fail!

1. Does the space seem adequately ventilated? Yes ____ No ____
2. Is the space reasonably quiet? Yes ____ No ____
3. Are all stairs with 4 or more steps equipped with handrails? Yes ____ No ____
4. Are all circuit breakers and/or fuses in the electrical panel labeled as to intended service? Yes ____ No ____
5. Do circuit breakers clearly indicate if they are in open or closed position? Yes ____ No ____
6. Is all electrical equipment free of recognized hazards that would cause physical harm (frayed wires, bare conductors, loose wires, flexible wires running through walls, exposed wires fixed to the ceiling)? Yes ____ No ____
7. Are electrical outlets 3 pronged (grounded)? Yes ____ No ____
8. Are aisles, doorways, and corners free of obstructions to permit visibility and movement? Yes ____ No ____

9. Are file cabinets and storage closets arranged so drawers and doors do not open into walkways? Yes ____ No ____
10. Do chairs appear sturdy? Yes ____ No ____
11. Is the space crowded with furniture? Yes ____ No ____
12. Are the phone lines, electrical cords, and extension wires secured under a desk or alongside a baseboard? Yes ____ No ____
13. Is the office space neat and clean? Yes ____ No ____
14. Are floor surfaces clean, dry, level, and free of worn or frayed seams? Yes ____ No ____
15. Are carpets well secured to the floor and free of frayed or worn seams? Yes ____ No ____
16. Is there a fire extinguisher in the home, easily accessible from the office space? Are they current? Yes ____ No ____
17. Is there a working (test) smoke detector within hearing distance of the work space (required)? Yes ____ No ____
18. Will the employee agree to arrange for an energy audit of the home by the local utility company and fire safety inspection by the local fire department within 30 days of the signing of their work from home agreement? Yes ____ No ____

19. We agree that in our opinion this is an acceptable home office space that allows the employee a reasonable opportunity to meet the job requirements as a telecommuter.

Yes ____ No ____

Telecommuting Employee Agreement

The following constitutes an agreement between [Your Business] and [Employee].

[Employee] agrees to participate in the telecommuting program and to adhere to the applicable guidelines and policies. [Your Business] concurs with the employee's participation and agrees to adhere to the applicable guidelines and policies.

Terms and conditions. The telecommuting agreement is subject to the following terms and conditions:

Duration. This agreement will be valid for a period of [specify term] beginning on [start date] and ending on [end date]. At the end of that time, both parties will participate in a review which can result in the continuation, termination or revision of the agreement.

Work hours. Employee's work hours and work location are specified in the Attachment at the end of this agreement.

Pay and attendance. All pay, leave and travel entitlement will be based on the employee's primary business location. Employee's time and attendance will be recorded as performing official duties at the primary business location.

Leave. Employees must obtain approval before taking leave in accordance with established office procedures. By signing this form, employee agrees to follow established procedures for requesting and obtaining approval of leave.

Overtime. The employee will continue to work in pay status while working at the home office. An employee who works overtime that has been ordered and approved in advance will be compensated in accordance with applicable law and rules. The employee understands that [Your Business] will not accept the results of unapproved overtime work and will act vigorously to discourage it.

By signing this agreement, the employee agrees that failing to obtain proper approval for overtime work may result in removal from the telecommuting program or other appropriate action.

Inspection. The telecommuting location will be inspected periodically to ensure that proper maintenance of [Your Business] equipment is performed, and that safety standards are met. Notice must be given to the employee at least 24 hours in advance of the inspection, which must occur during normal working hours.

Liability. [Your Business] will not be liable for damages to the employees' property that result from participation in the telecommuting program.

Reimbursement. [Your Business] will not be responsible for operating costs, home maintenance, or

any other incidental cost (e.g., utilities) whatsoever, associated with the use of the employee's residence. The employee does not relinquish any entitlement to reimbursement for authorized expenses incurred while conducting business for [Your Business]

Workers' Compensation. The employee is covered under the Workers' Compensation Law if injured in the course of performing official duties at the telecommuting location.

Work assignments. The employee will meet with [designate contact person] to receive assignments and to review completed work as necessary or appropriate. The employee will complete all assigned work according to work procedures mutually agreed upon by the employee and [the contact person] according to guidelines and standards stated in the employee's performance plan.

Employee evaluation. The evaluation of the employee's job performance will be based on norms or other criteria derived from past performance and occupational standards consistent with these guidelines. For those assignments without precedent or without standards, regular and required progress reporting by the employee will be used to rate job performance and establish standards. The employee's most recent performance appraisal must indicate fully achieved standards.

Records. The employee will apply approved safeguards to protect [Your Business] records from unauthorized disclosure or damage. Work done at the telecommuting location is considered [Your Business] business. All records, papers, computer files, and correspondence must be safeguarded for their return to the primary business location.

Curtailed of the agreement. [Specify whether the employee may continue working for your business if the employee no longer wishes to telecommute. Also specify the circumstances under which the telecommuting agreement will be terminated by your business (e.g., if continued participation fails to satisfy business needs) and the consequences of that termination on the worker's continued employment.]

Performance location. The employee agrees to limit performance of assigned duties to the primary business location or to the approved home location. Failure to comply with this provision may result in termination of the telecommuting agreement and/or other appropriate disciplinary action.

EMPLOYEE EQUIPMENT ISSUE AGREEMENT

This agreement is made this _____ day of _____, 200__, between
[YOUR COMPANY] (Employer) and _____ (Employee).

In order to effectively perform their assigned tasks, Employee may use [YOUR COMPANY'S] equipment, as outlined below, at the telecommuting location with the approval of [EMPLOYEE'S MANAGER]. Such equipment must be protected against damage and unauthorized use. [YOUR COMPANY'S] owned equipment will be serviced and maintained by [YOUR COMPANY]. Any equipment outside of the equipment outlined below and used by the employee will be at no cost to [YOUR COMPANY], and will be maintained by the employee.

[YOUR COMPANY] agrees to provide the following described property to Employee, while Employee is in employment of [YOUR COMPANY]. In consideration of the use of this property at no cost of Employee, Employee assumes the risk of and shall be responsible for any loss or damage to the property specific to this agreement. In the case of loss, Employee shall be liable for not more than the actual original purchase amount of the property. In the case of damage, the Employee shall be not be liable for more than the cost of repair of the property or replacement with comparable materials.

Employee agrees to return the issued property, all or in part, to Employer upon demand of Employee's Manager or any officer of [YOUR COMPANY]. The time frame shall be immediate, if the property is immediately accessible to the Employee or the next day from the time of notification by the Manager.

In case of loss, damage or failure to return product upon request, the Employee authorizes [YOUR COMPANY] to deduct an amount specific to the total loss and/or repair of the product from Employee's paycheck. Should there remain a balance due after deductions have been made; Employee agrees to pay [YOUR COMPANY] the balance due. Should the Employee refuse to pay Employer for any balance due, Employer has the right to collect the balance through the Municipal Courts of the County [YOUR COUNTY]. The Courts ruling in favor of the Employer in any dispute of balance due, the Employee shall be responsible for all attorneys' fees, collection fees and Court costs.
