

HOW WE'RE KEEPING YOU AND YOUR BUSINESS SAFE

Safety Checklist

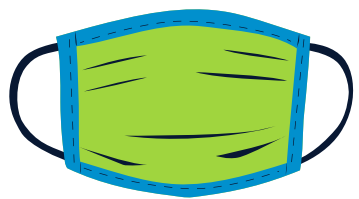

Our employees handwash frequently for 20 seconds or more, before and after touching any of your office equipment

They also carry hand sanitizer if handwashing is not available (such as on an outdoor job site)

We are requesting all employees stay home if they're sick or were possibly exposed to an individual with COVID-19

All employees have face masks they will wear if they have to visit your office

It's our experience that many repairs and tasks can be completed remotely, including assisting your remote staff

Our employees have been instructed to practice social distancing measures

Valley Techlogic is committed to your health and safety.

For more information on our safety procedures or any questions on how we can assist your business at this time, visit valleytechlogic.com/calendar to schedule a no obligation consultation.
