## Malware Warning Signs

### **Popups popup everywhere.**

**If your computer is currently being inundated with popups, it could be a sign you have malware or a virus.**

### **You get a notification your antivirus has been disabled.**

**If you receive a notification that your anti-virus protection has been disabled and YOU didn't do it, that's a big red flag.**

### **Your friends are receiving strange messages.**

**Another malware sign is if your friends and family start receiving strange messages from you via email or social media.**

### **Your system is running slow.**

**While you should make sure you're not just maxing out your RAM or any other normal causes, an extremely slow computer is another warning sign.**

### **Your computers crashing - a lot.**

**Another warning sign of malware or a virus is a computer that crashes or has frequent blue screens.**

**If you see any of these warning signs, report them to your IT ASAP!**
